OBJECTIVE

Hardworking Information Technology student who builds web and mobile applications with HTML, CSS, JavaScript, TypeScript, PHP, React Native and SQL databases. Committed to continuous learning and eager to contribute to real-world technology projects.

EDUCATION

Bachelor of Science in Information Technology *2023 – Present*
College of Our Lady of Mercy — Pulilan, Bulacan

Information and Communications Technology (ICT) Strand *2021 – 2023*
Richwell Colleges, Incorporated — Plaridel, Bulacan

TECHNICAL SKILLS

Languages & Markup: HTML, CSS, JavaScript, TypeScript, PHP basic, C#
Frameworks: Bootstrap, React Native, Expo
Database & Backend: MySQL, PostgreSQL, Supabase, HeidiSQL, Database Design, CRUD Operations
Hardware & Networking: Computer Troubleshooting, OS Installation, IP Configuration, Ethernet Cabling, Network Setup
Tools: VS Code, XAMPP, Laragon, phpMyAdmin, Git, GitHub, Cloudflare Pages
Other: Responsive Web Design, Software & OS Configuration, Workstation Setup

CERTIFICATION

Responsive Web Design Certification **2025**
freeCodeCamp

JavaScript Certification (Ongoing) **2026**
freeCodeCamp

Ethical Hacking; Cybersecurity Incident Response & Forensics; Network Forensics & Threat Intelligence **2026**
CodeSpark — 3-day cybersecurity training (completed October 2026)

PROJECT EXPERIENCE

Thesara — Thesis Planning App for Student Groups (Android and Web) **2026**
Solo Project | thesara.pages.dev

- Designed and built the Android app, website, database and server functions on my own, using TypeScript, React Native, Expo and Supabase (PostgreSQL)
- Added chapter progress, group tasks, a deadline calendar with reminders, invitations, documents and references, and Word export
- Set up email and push notifications, and published the website on Cloudflare Pages

Web-Based Barangay Information & Socio-Economic Profiling System **2026**
Academic Capstone Project for the Office of Barangay Dampol 2nd-A | BS Information Technology

- Designed and developed a full-stack web application using PHP and MySQL, with user authentication, CRUD operations, and a relational database
- Built responsive front-end interfaces using HTML, CSS, JavaScript, and Bootstrap for cross-device compatibility
- Managed database schemas and SQL queries using MySQL and phpMyAdmin
- Collaborated with teammates to plan, develop, and present the project for academic evaluation

PetClinic Appointment Windows Form Application **2025**
Academic Group Project | BS Information Technology

- Developed a desktop Windows Forms application in C# for managing pet clinic appointments
- Designed and integrated a Microsoft SQL Server database to store client, pet, and appointment records
- Collaborated with a teammate to build appointment scheduling and record-management features

Picture Puzzle (Windows Game) **2025**
Two-Person Group Project | BS Information Technology

- Coded the C# Windows Forms game logic: image cropping into tiles, shuffling, win check, timer and a leaderboard sorted by fastest time

Turn-Based Battle Game (Windows Game) **2025**
Two-Person Group Project | BS Information Technology

- Coded the Player class, an EnemyPlayer class that inherits from it, and the turn logic with health, mana, skills and misses; my teammate designed the interface

ACADEMIC & LABORATORY EXPERIENCE

- Diagnosed and resolved hardware and software issues on lab workstations and peripherals
- Installed and configured operating systems (Windows) in a controlled lab environment
- Set up and tested basic local area networks including IP address assignment and Ethernet cable wiring
- Organized cable management and workstation setup for a functional lab environment
- Completed web development exercises covering responsive layouts and dynamic content with JavaScript

CORE COMPETENCIES

Problem Solving • Attention to Detail • Team Collaboration • Technical Documentation • Adaptability • Willingness to Learn
